

Summary	Four years at Thoughtworks shipping for top consultancy and 5 e-commerce clients across WMS, promotion engines, and checkout flows taught me how product outputs lead to business outcomes. An MBA at Masters Union sharpened this lens. Now I build Ahar.AI, an Agentic AI platform to give restaurateurs their evenings back. The title is catching up to the work.		
Education			
2025- Present	MASTERS' UNION PGP in Technology & Business Management CAT 99.11% ile GRE 326/340 Core Member - Third Block Club 1st runner up in Managerial Accounting One Day Challenge Finalist in Stats, Ops, Product Growth & Data Viz ODC		Gurugram
2016-2020	AMRITA SCHOOL OF ENGINEERING, AMRITA VISHWA VIDYAPEETHAM B-Tech in Electronics and Communication Engineering Secured an academic scholarship of 25% Podium Finish in Intra-College Level Coding and Mime Competitions		Coimbatore
2013-2016	Class XII (CBSE) - 92.2% Class X (CBSE) - 10 CGPA		Chennai
Experience			
Sep'20-Sep'24	THOUGHTWORKS Software Consultancy building products for a top consulting firm & fashion e-commerce clients Consultant – Quality Analyst Product Owner (Acting) Product Planning and Release Management - Shipped 40+ features/quarter for 3 clients by leading 15-member team for promo planning engine's release readiness - Cut active backlog by 10% per release by prioritizing tech debts & bugs, aligning with cross-functional stakeholders - Led problem discovery for community management platform by building value prop canvas by interviewing 10+ leads - Ensured zero inventory errors in ~1M orders/yr by defining 50+ order flows & shaping roadmap of a global WMS Product Functional Validation - Raised cart to order CVR by 20% surfacing user dropoff bugs with five payment providers in revamped checkout flow - Maintained SLA parity by load testing 100+ APIs & backward compatibility via contract testing in app strangulation Product Quality Ownership - Increased test coverage to 80% from 50% & reduced runtime by 30% by stabilizing flaky UI test automation scripts - Raised bug detection rate to >85% from 75% within 2 releases by leading root cause analysis & mitigation protocols - Slashed failure time to < 5s from 1 hr for ETL ingesting daily promo analysis data with pre-run data validation script - Accelerated code break detection from 4 days to 1 day by building reports & setting Slack alerts in nightly UI test runs Cost Optimization and Organization Impact - Saved ~\$70K/yr in cloud costs by shifting test env to scheduled terraform provisioning reducing env uptime by 75% - Organized monthly tech events with guest speakers, each attracting 50+ external attendees, boosting firm's visibility - Upskilled 40+ women in web automation in VAPASI workshop supporting hiring of 3 interns with long career break		
Live Projects			
Dec'25-Apr'26	AHAR.AI An Agentic AI powered restaurant management software for owners to automate backend operations Cofounder & Product Lead - Saved etd. 12 man-hrs/wk by building event-driven AI agents to automate procurement workflow & margin analysis - Reduced LLM inference cost per 1M token by 85%, by redesigning chatbot system architecture to use Claude Skills - Developed Daily Sales Prediction ML Model with 93% Accuracy estimated to reduce restaurant's PO cost by ~10% - Secured ₹50,000 grant and awarded "Highest Potential Product" for developing the MVP for VIP MVP Challenge		Gurugram
